2012 / 2013	Business Information Systems	DIT , Dublin, Ireland
2009 / 2014	Master of Science	EPITECH , France

PERSONAL INTEREST

Electronic music, travel, backpacking, surfing, skiing.

SMART MOBILE FACTORY

mobile full service agentur

Berlin, January 19, 2016

Letter of Recommendation

To whom it may concern

Kevin Delord has been employed by Smart Mobile Factory GmbH since January 1, 2014 as iOS developer, following a successful internship from September to December 2013, and has been iOS Team Lead since January 2015.

Smart Mobile Factory is a full service agency for strategic consulting in the mobile business and offers app conception as well as app development, marketing know-how and e-commerce solutions to clients from all branches.

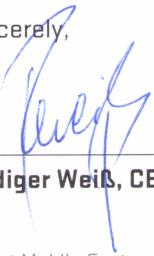

Mr. Delord is an extremely skilled developer with great analysis and debugging skills. He is a very capable problem solver and a great team leader. He is a very pleasant colleague to work with and is very responsible.

He has scaled his skills, talents, and abilities to respond to all kinds of needs, e.g. projects, company infrastructure, quality, etc. He has shown great commitment by learning and improving the German language up to a professional level.

In his role as team lead, he has managed to create a structure in the iOS department and has brought different people together in one team. He has created a code style guide in order to make sure good code quality and syntax is used in the iOS team. He has also introduced a useful and efficient code review process in the company (Pull Request). He has learnt new technologies, such as Swift, and has introduced them to his colleagues. He has specialized in business infrastructure and continuous integration (JIRA, Jenkins, Hockey). In addition, he started a process of developer conferences within the company in order to share knowledge, and has written documentation about infrastructures and code review processes. Over the past two years he has worked on over 40 projects.

It is a pleasure working with him.

Sincerely,

Rüdiger Weiß, CEO
